

## Introduction

BMJ Group provides reliable evidence-based medical information to doctors, researchers, health care workers, students and patients. Our journals, evidence-based medicine products and learning services are designed to move medical knowledge forward, aid the scientific research process and enable health practitioners to make better clinical decisions.

# BMJ

Our flagship journal, **BMJ**, is an international weekly medical journal for doctors. BMJ provides a thought-provoking and intelligent treatment of major health issues and has established itself as an integral part of the fabric of the medical industry since its inception over 150 years ago.

Our award winning website, [bmj.com](http://bmj.com), is updated daily and visited by over 1.3 million users per month. With free access to original scientific research the BMJ has an archive dated back to 1840 (Volume 1, Issue 1). [bmj.com](http://bmj.com) is easy to navigate and features four channel pages which cover News, Education, Research and Comment, plus regular polls, podcasts and video.

# ClinicalEvidence

**Clinical Evidence** from the BMJ Evidence Centre is the international source of best available evidence on the effects of common clinical conditions. It provides constantly updated systematic reviews, integrated with additional evidence based medicine (EBM) resources to create a powerful decision support reference tool.

## Key features:

- Systematic reviews that appraise and summarise over 3300 interventions in over 670 clinical situations
- Quick and timely access to the most relevant research findings
- GRADE scores ranking the quality of the evidence presented
- Monthly updates and new topics
- Patient leaflets to provide patients with plain-English information on their condition

[clinicalevidence.bmj.com](http://clinicalevidence.bmj.com)

# BestPractice

**Best Practice** from the BMJ Evidence Centre is a completely new concept in information delivery at the point of care. It combines the latest evidence with expert opinion and guidelines – presented in a step-by-step approach, covering prevention, diagnosis, treatment and prognosis. **Best Practice** provides a second opinion in an instant.

## Key features:

- Integrated evidence from *Clinical Evidence* combining the latest research with expert guidance
- Unrivalled coverage (information on over 10,000 diagnoses by the end of 2009)
- Seamlessly linked drug formulary for quick checking of prescription guidance
- A standard structure for each condition designed around the patient consultation
- A constantly updated resource with full reference links and colour images where available

# BestHealth

**Best Health** from the BMJ Evidence Centre interprets medical research for patients giving them clear, straight forward information about their condition enabling them to make more informed decisions.

## Key features:

- In-depth information on over 180 common conditions
- Evaluation of the benefits and side-effects of over 1500 treatments
- Assessment of 23 common operations and tests
- Decision-support guidelines to help patients assess their options and understand their condition
- Regular updates including new evidence and drug guidelines

# BMJ Learning

BMJ Learning is an independent and peer-reviewed CPD and postgraduate training site, offering doctors, nurses, medical students and other health care professionals, a fast and convenient way to keep up to date with developments in general practice or specialist medicine.

## Key features:

- Now has access up to 490 interactive modules depending upon your profession
- Helps users earn CPD and QOF points (conditions apply)
- Trains and tests users skills at a time and place that suits them

- Prepares users for any exams they may face and keeps a record of their learning
- Allows users to stay up to date with their training, practice, appraisal and revalidation

[learning.bmj.com](http://learning.bmj.com)

**OnExamination.com** is an inline learning revision resource for medical students.

**OnExamination.com** contains high quality questions based on typical exam themes which are reviewed continuously to ensure accuracy.

## OnExamination.com

- Contains over 1300 questions, 2000+ 'extended matching question' terms as well as over 900 'multiple choice' questions and more than 130 'short answer' questions.
- Gives picture quizzes including X-rays and ECGs
- Provides immediate explanations of answers

## Get feedback:

- Details score analysis so that students can gauge performance strength against their peers and also their strengths and weaknesses
- Has adapted learning which personalises the site to individual education needs

[onexamination.com](http://onexamination.com)

## Drug and Therapeutics Bulletin (DTB)

For over 45 years, DTB has been an independent, indispensable part of evidence-based clinical practice. DTB offers healthcare professionals detailed assessment of, and practical advice on, individual medicines and other treatments, groups of treatment and the overall management of disease.

- Independent of the pharmaceutical industry, regulatory authorities and Government
- Deliberately tackles everyday dilemmas faced by healthcare professionals and their patients
- Evidence-based not evidence-limited
- Succinct, easy-to-read and practical
- Extensively peer-reviewed
- **Coming Soon** – Online archive back to 1962
- **New for 2009** – 50% increase in content, plus a new editorial and podcasts

[dtb.bmj.com](http://dtb.bmj.com)

## BMJ Case Reports

**BMJ Case Reports** is a unique and ever growing repository for all healthcare workers and researchers to submit their case reports online, search and view all published content.

### Key features:

- Over 1,000 reports published from 55 countries, over 200 considered for publication each month currently achieving an 80% acceptance rate
- Eases the publishing pathway for junior doctors who will gain international recognition
- Submit as many case reports as you like
- Growing repository of case reports, patient consent form available in 13 different languages
- Sophisticated searching by specialty and patient demographics
