

Good technology systems are invisible.

Customers will judge them as much on the content they contain as on the delivery infrastructure. So you can't afford to be let down by your content. You need a credible partner to feed authoritative, accurate content into your platform.

You need Action Sets from the BMJ Evidence Centre.

Action Sets are care protocols that have been developed to deliver trustworthy, peer-reviewed guidance right into the clinical workflow. We translate guidelines into patient management pathways that support diagnosis, treatment and management of the most common conditions. All our suggested tests and interventions are backed up by rigorously assessed evidence and expert opinion. And Action Sets can be localised to ensure that the guidance they provide is precisely appropriate to your customers and their users.

We complement and strengthen your system by providing the high-quality, interactive content that it deserves. Together, we can enable our customers to deliver consistent, accurate and efficient healthcare to their patients.

For more information about partnering with the BMJ Evidence Centre, please email consortiasales@bmjgroup.com or call +44 (0)20 7383 6693.

CARE PROTOCOLS
FROM THE BMJ EVIDENCE CENTRE

ActionSETS

CARE PROTOCOLS
FROM THE BMJ EVIDENCE CENTRE

Features

- innovative development pipeline with focus on diagnosis and management
- customers can pick and mix content modules to match individual patient needs
- peer-reviewed by local experts and based on high-quality evidence sources
- continuous evidence surveillance with rolling annual updates
- links to graded evidence and supporting guidance
- links to and compliance with national guidelines
- implementation support and ongoing evidence consultancy
- customers can opt to include web access to other BMJ Group resources including *Clinical Evidence*.

More than 1000 hospitals worldwide trust the BMJ Group for authoritative evidence-based tools and services. The familiarity and trustworthiness of the BMJ brand encourages usage and helps your customers to maximise the return on their investment.

Comprehensive decision support package

EVIDENCE SUMMARIES

Our unique evidence summaries isolate the precise piece of evidence that supports the guidance given in the order item. They incorporate GRADE statements, essential information about the condition, differential diagnoses, step by step treatment guidance, follow-up recommendations and patient leaflets.

• BEST PRACTICE

Licensees can opt to upgrade their Action Sets to include full web access to our *Best Practice* point-of-care tool that provides comprehensive evidence, expert opinion and guidance relating to 10,000 diagnoses, including full reference links and colour images.

• CLINICAL EVIDENCE

Web access to the gold-standard of evidence-based medicine can also be packaged with your Action Sets. *Clinical Evidence* provides systematic reviews of over 3300 interventions in the context of over 670 clinical situations.
